

Voice Control with Amazon Alexa

Operate your shades using voice commands:

Our Smart-Shade app with the Amazon "Alexa" or other voice control devices, can create an atmosphere or mood thru voice control by pre-programming the "Alexa" and the Smart-Shade app, to perform a set of actions when a particular command is given, such as:

Scenario: Pre-program a voice command such as....

"Alexa, It's Bed Time"

Alexa and the Smart-Shade app could then close all the shades, turn down the lights and play softer music.

SMART-SHADE

Optional Smart-Shade WiFi/Bluetooth hub needed when beyond range of Smart-Remote.

Available for all motorized Spettmann awning and shades.

Select one or multiple channels (shades) to operate together

CLOSE - Shade or Awning

Inside Temperature based on Smart-Remote location

Monitor Remote Battery level

Highlight all channels (shades) to operate simultaneously

Label each channel (shade) with individual names or I.D. for easier recognition

OK | STOP

Outside Temperature based on “The Weather Channel”

OPEN - Shade or Awning

Adjust mode & settings

INTRODUCING

The new and innovative smart app for controlling your shades or awnings using Bluetooth®, WiFi and Voice Control.

CONTROL YOUR SHADE WITH SMART DEVICES

- More energy efficient
- Operate single or multiple shades simultaneously
- Both indoor and outdoor temperatures are displayed
- Monitor the remote battery levels

CREATE CUSTOM ZONES

- ZONE - location or area where shades are located (upstairs or downstairs)
- Utilize your phone or iPad’s GPS to establish zone location

ORGANIZE YOUR SHADES

- Operate multiple shades in each zone
- Name each shade for easier use
- Edit or delete any shade in a zone

Voice Control* Smart Devices

*Smart-Shade is compatible with most Voice Control devices.

Optional Smart-Shade WiFi/Bluetooth Hub

- Operate your shades from anywhere around the world
- Compatible with Voice Control devices
